## Short description:

This neat holster will save your macBook chargers life span. Works with all mac chargers.

## Description:

I was tired of seeing my expensive macBook charger on the floor. So I invented this neat holster that mounts to any surface and it is so handy!

Prints in plastic with your 3d printer in 1-2 hours. Very sturdy and smart design is designed to be 3d printed with no support or overhangs.

- Compatible with all laptop chargers.
- Works in any direction so cord passes through and everything still works.
- Route the cord through a groove on the back for anti theft.
- 3 built-in recessed mounting holes for standard self tapping screws

Download and start using it today. You will want one at the office and home and workshop. I can add custom logo and design for you.

Note: The units are inches, so you may need to scale the part to 25.4 for metric.

If you can, please use the online documentation found at <http://www.youmagine.com/designs/chargerbuddy> because those may have been updated. Also, there you can interact and provide praise and/or feedback.
